

Code examples

These examples use native fenced-code highlighting. Visit the [overview](#) or [long guide](#).

JavaScript

```
// Preserve indentation and line breaks.
const greeting = "Hello, reader";
function greet(name) {
  return `Hello, ${name}!`;
}
console.log(greet("Starlyt"));
```

JSON

```
{
  "title": "Starlyt Docs",
  "enabled": true,
  "navigation": ["Overview", "Long guide", "Code examples"]
}
```

Shell

```
# Build an ordinary consumer site.
jigyll build --baseurl /docs
printf '%s\n' "A deliberately long line that scrolls inside the code block
without widening the document or changing the copied source."
```

Plain text

```
<article data-example="literal">  
  & This is text, not executable markup.  
    indentation stays intact  
</article>
```
